

Career Opportunities

If you are highly driven, innovative and value teamwork, we invite you to join us and contribute to our exciting growth. Established since 1990, Esri Singapore is a market leader in providing advanced GIS technology, software solutions, consulting and training to a wide and growing range of customers.

Interested candidates should submit their resumes with a cover letter (jobs@esrisingapore.com.sg) indicating why they are interested in this opportunity and why they are the right choice for the company.

GIS Consultant – Unlock Business Value

This role will require you to spend time with customers to understand their business and operational priorities, leveraging on ArcGIS to organize their information and help them to derive value-adding business intelligence.

It will also require you to support GIS project implementations, product demonstrations, training and technical support.

The Company will equip successful candidates with necessary foundation training to achieve success.

Requirements:

- Between 2 to 5 years working experience
- Posses tertiary education in Engineering or Computer Science (polytechnic or university)
- Analytical and possess good problem solving skills
- Strong interpersonal and communications skills, both oral and written
- Good personal time management
- Proven record in writing and documenting code for both users and other developers
- Knowledge of RDBMS
- Experience in Object Oriented Development (J2EE and/or .NET) is an advantage
- Experience in Geographic Information Systems or Spatial Sciences is an advantage

Those not residing in Singapore need not apply.
